By Pilot Harrison Ford-

After a normal taxi and run-up, I departed runway 21 from KSMO. After rotating and lifting off, I accelerated to 80 mph and began a normal climb out, following the published noise abatement procedures for KSMO. While on the departure leg, at approximately 1,100 feet MSL, the engine failed without any prior indication of any problem. I immediately lowered the nose, accelerated to 85 mph and initiated a 180-degree left turn. I reported engine failure and requested an immediate return to the airport, and continued the descent at 85 mph. I have no further recollection of the flight or any of the events immediately before or after the landing.
